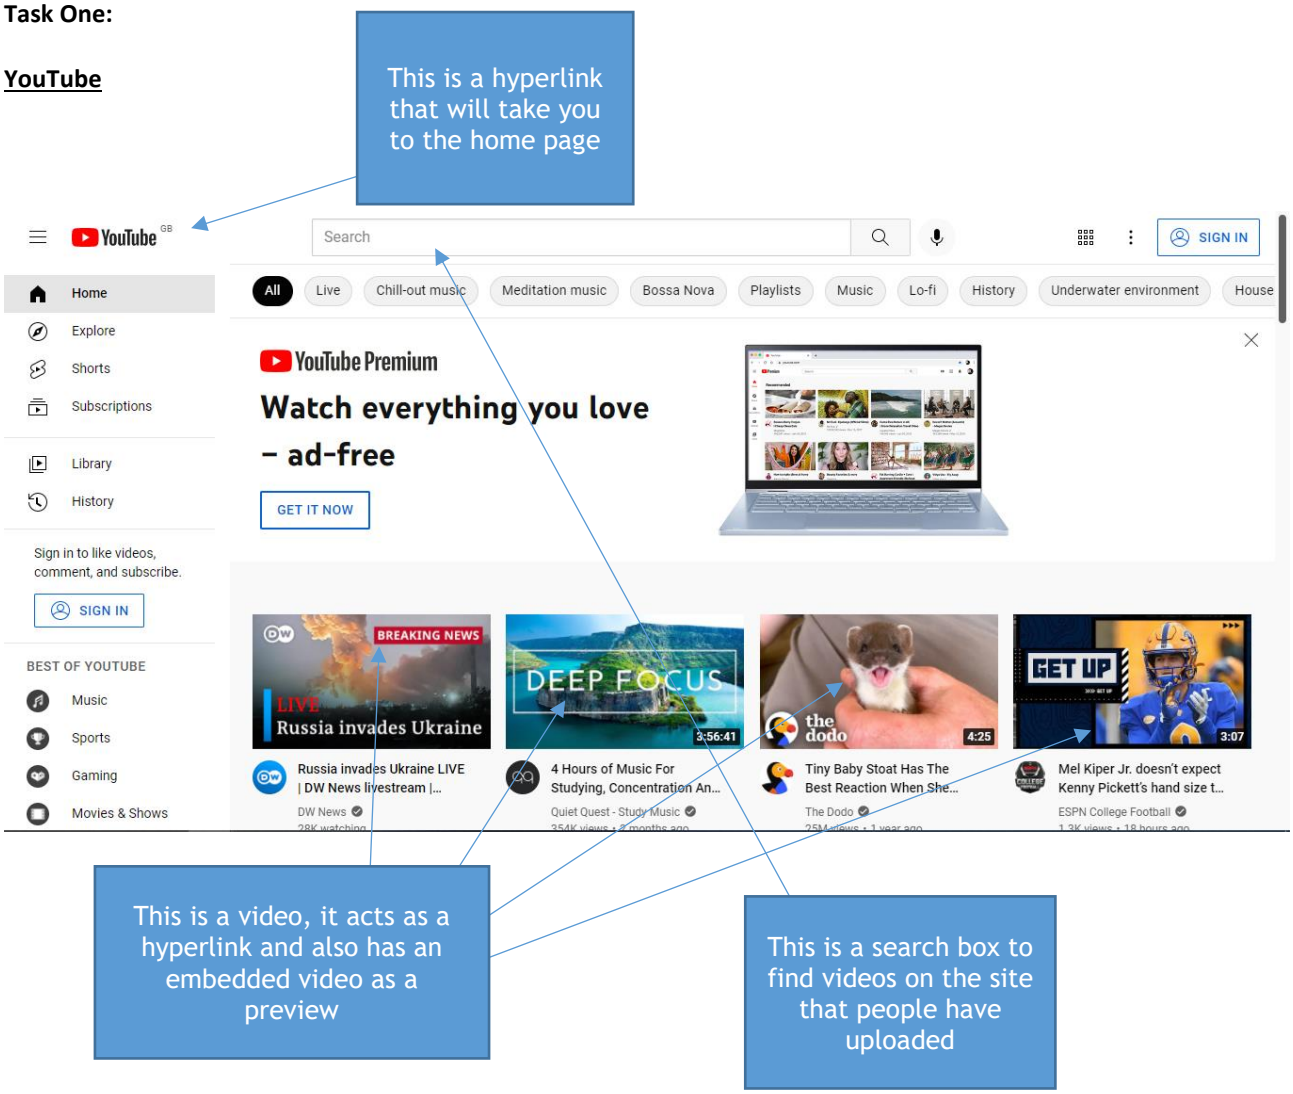
Learner declaration

I certify that the work submitted for this assignment is my own. I have clearly referenced any sources used in the work. I understand that false declaration is a form of malpractice.

Learner signature: Sebastian Archer **Date: 02/03/2022**

Task One:

<u>YouTube</u>



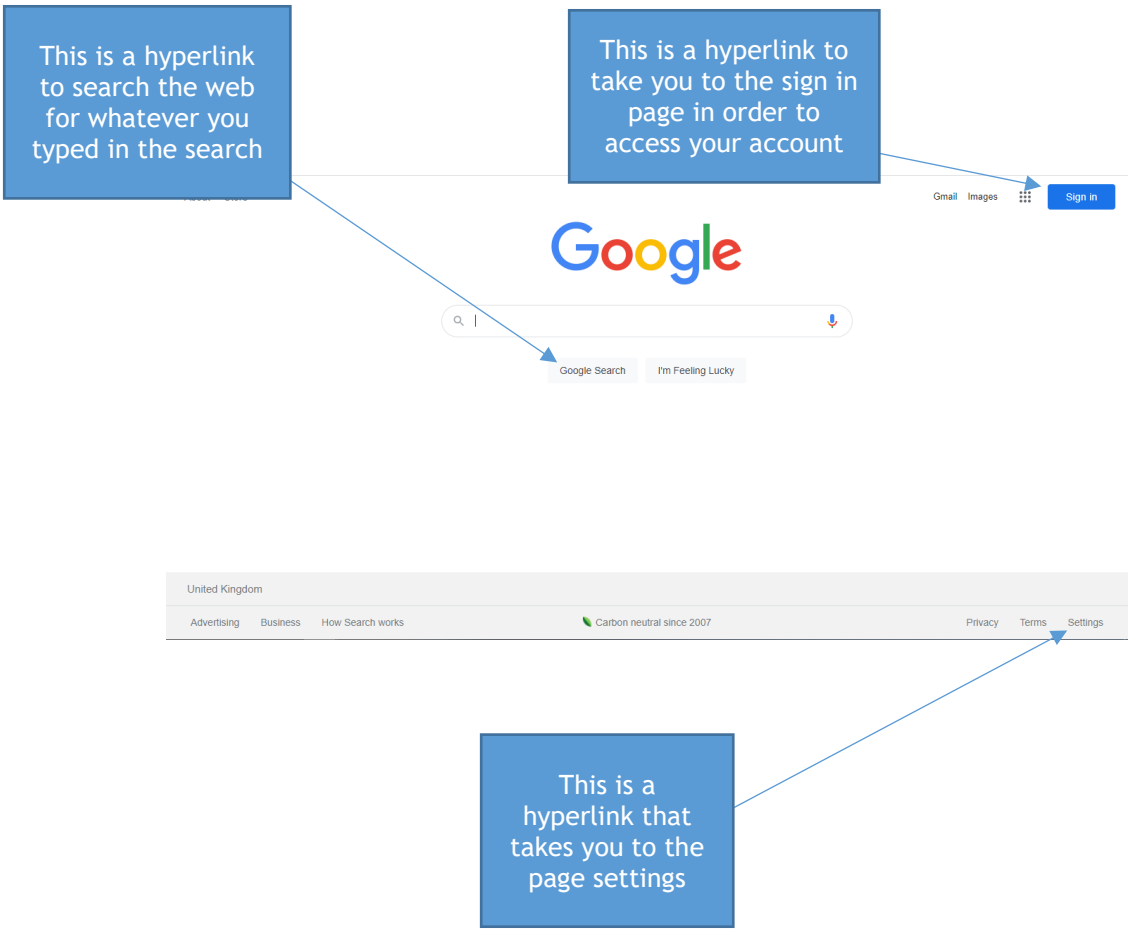
(Continue)

Google

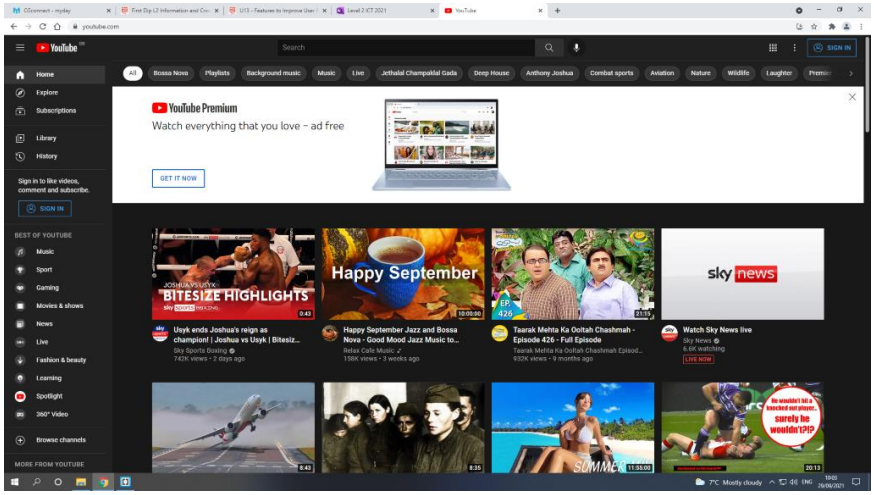
It's used as a search engine.

It's full of hyperlinks to add to the page's functionality.

It allows you to sign in to access user account history and extra functionality such as account services.



Task Two:



Useful:
This website is useful to everyone because it contains a various number of videos that people can watch whenever they want, the number of videos is endless and there's content that everyone can enjoy.

Findable:

There are many aspects to YouTube that helps its users find what they want to use, for example there are different category buttons at the top of the page for things like music, or different kind of sports or playlists. On the left side there are also different categories of videos to watch, and if you had an account, you could view your saved library or see video history.

Credible:

YouTube itself could not be considered a credible source because anyone is able to upload videos and spread misinformation if the video gains popularity. Websites like YouTube and its functions are generally abused for this because it is easy to reach people with different kinds of videos.

Task Three:
This website has a simple colour scheme, which is red and white. It is very popular amongst most people, and people watch multiple videos daily on the platform.

Strengths of YouTube:
YouTube is free to use for everyone, but there are a few videos that you have to pay for, but it's very unlikely you'll come across one unless you're specifically looking for it.
You're able to earn money through your videos through revenue, it depends on many views, likes and subscribers you have on your channel and your videos.
It's very easy to use, even someone who doesn't understand how to navigate or use computers well could understand how to use YouTube with ease.

Weaknesses:
Everything is public, you don't really have any privacy on YouTube because almost everything you like or save is public. You have the option of hiding this, but if you don't hide it then it will show on your public profile.
There are a lot of rules to follow when you upload a video, a big one is the copyright rule. You aren't allowed to upload any copyrighted content.
Your account can be disabled without warning and it can be very hard to regain access to your account and personal content.
